**Re: Pension Protection Act (PPA) Actuarial Certification –
Western Conference of Teamsters Pension Plan**

In accordance with IRC Section 432(b)(3)(A), I have prepared the attached actuarial certification for the plan year beginning January 1, 2025 for the Western Conference of Teamsters Pension Plan.

In my opinion, the assumptions used for the actuarial certification are individually reasonable based on the experience of the plan and on reasonable expectations of anticipated experience under the plan. The projections in this certification are dependent on the assumptions used. Differences between these projections and actual amounts depend on the extent to which future experience conforms to the assumptions made for this analysis. It is certain that actual experience will not conform exactly to the assumptions to be used in this analysis. Actual amounts will differ from projected amounts to the extent that actual experience is better or worse than expected.

I am a member of the American Academy of Actuaries (AAA) who meets the Qualification Standards of the AAA to render the actuarial opinion contained herein, I hereby certify that, to the best of my knowledge and belief, this certification is complete and accurate and has been prepared in accordance with generally recognized and accepted actuarial principles and practices.

Sincerely,

Grant Camp, FSA, EA, MAAA

Western Conference of Teamsters Pension Plan
Actuarial Certification Under PPA for Plan Year Beginning January 1, 2025
Summary of Assumptions/Methods

The IRC Section 432(b) funding measurements are based on:

- Participant data and plan provisions as stated in the January 1, 2024, Actuarial Valuation report, dated August 26, 2024.
- The January 1, 2025, unaudited market value of assets was estimated based on the following:
 - An estimated 2024 investment return on the Plan's Discretionary assets of 4.6%, as reported by the Plan's investment consultant.
 - December 31, 2024 market value of the 2024 bond dedication of \$30.9 billion, as reported by the portfolio's investment manager.
 - December 31, 2024 market value of the SBA bond dedication of \$1.6 billion, as reported by the portfolio's investment manager.
- The summary of contributions received for the year ended December 31, 2024, provided by the Plan Administrator.
- Market value rates of return for 2025 and subsequent years were assumed to be:
 - 6.50% for non-dedicated assets,
 - The assumed rates specified in the January 1, 2024 Actuarial Report for the SBA, and
 - The net internal rate of return at December 31, 2024 of 5.585% is assumed to remain constant for the 2024 Dedication.

No future asset gains or losses other than the gains or losses related to the asset smoothing method are reflected.

- The active population is assumed to remain stable as used in the January 1, 2024 actuarial valuation for each plan year after December 31, 2024.
- Based on input from the Plan Administrator, the projected annual contributions for 2025 and all subsequent years will be \$2.655 billion. Future annual contributions do not include ERISA 4235 funding only contributions and withdrawal liability payments.
- The assumptions and methods used in this analysis are the same as those specified in the January 1, 2024 Actuarial Valuation except as follows:
 - An additional layer was added to the 2024 bond dedication to include retirees and beneficiaries in pay status as of January 1, 2024 who were not already covered by the original dedication.
- The actuarial certification is based on: 1) the proposed Multiemployer Plan Funding Guidance provided by the IRS on March 18, 2008, 2) the December 2007 Practice Note issued by the Multiemployer Plans Subcommittee of the Pension Committee of the American Academy of Actuaries, 3) the "Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010" (PRA 2010), and 4) IRS Notice 2010-83, 5) the "Multiemployer Pension Reform Act of 2014" (MPRA), and 6) action taken by the Board of Trustees prior to the mailing of this certification.
- Section 6 of the January 1, 2024 actuarial valuation includes a risk assessment, disclosure, and key plan maturity metrics applicable to these calculations.
- The valuation results were developed using models intended for valuations that use standard actuarial techniques.

- Test 2 Projected funding deficiency in current year or next following 3 plan years (4 plan years if 65% funded or less)¹ or
- Test 3 Present value of vested benefits (actives) is less than present value of benefits (inactives), and present value of projected contributions is less than the unit credit normal cost plus interest on the unfunded present value of accrued benefits and projected funding deficiency in current or next 4 plan years¹ or
